WELDING ELECTRODES FOR ROLLING MILL APPLICATIONS

MaxiDura HF-100	For buffer line on En 8,9 Roughing Rolls, Rotary Shear Blades. Machinable electrode.
MaxiDura HF-104	For reshaping passes on En 8,9 Roughing Rolls, Guide boxes, pinch rolls, Tell breaker. Non-machinable electrode.
MaxiDura HF-105	Adamite Roughing rolls all areas. Adamite roll baring areas, Cold Shear blades, raging passes on adamite rolls (lining on passes), passes recovery on adamite rolls.
MaxiDura HF-108	For Rail & Hammer.
MaxiDura HF-110	Alloy steel Roughing rolls all areas. Alloy steel roll baring areas, raging passes on alloy steel rolls (lining on passes), and passes recovery on alloy steel rolls.
MaxiDura HF-102	SG Iron Roughing rolls all areas. SG Iron roll baring area, raging passes on SG Iron rolls (lining on passes), passes recovery on SG Iron rolls.
MaxiDura CI-115	Nodular cast iron, Broken large motor and cover, large pulleys, guide box build-up and re-shaping, coiler plate, CI to CI and CI to MS welding.
MaxiDura SP	Broken universal cross and joints, cardan shafts, main & pinion drive shafts, furnace anchors, leakage in incinerators, die steel, guide rolls, broken gear teeth and gear hubs, creaks in shafts, broken spanners, flying shears blade, different forged component, dissimilar and unknown steel.
MaxiDura HF-150	Special Electrode for Hot Shearing Blade.
